

PROEIZ™

PRO REVEAL

Pro Reveal Facial System

3 in 1 Technology simultaneously to treat Face & Body;
Achieve Radiant and Rejuvenated skin in 1 session!

What is Pro Reveal Facial System?

Pro Reveal Facial System is a fully customizable, non-invasive, and patented skin surfacing that uses exfoliating tip, vacuum suction, flow adjustors, and condition-specific solutions to deliver many precise skin benefits in **one simultaneous action**.

3-in-1 Technology Simultaneously

EXFOLIATES
Removal of dry, damaged skin cells

EXTRACTS
Deep cleansing of skin surface and pores

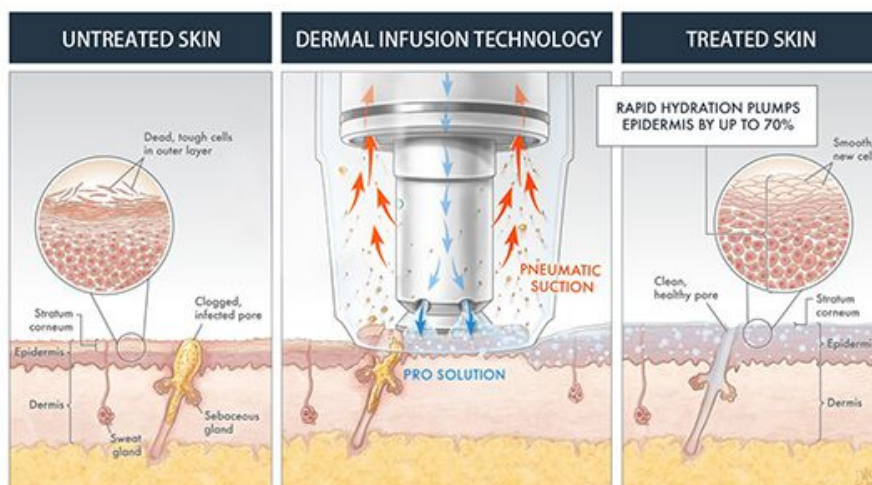

INFUSES
Delivery of condition-specific serums deep into the skin

The pneumatic chamber at the hand piece tip creates closed-loop suction onto skin upon contact, instantly lifting skin for extraction and abrasion by a recessed exfoliating tip. At the same time, pneumatic pressure infuses skin with ingredient-rich solutions.

Hence, this is how Pro Reveal Facial System eliminates time-gaps between exfoliation and solution application for optimal skin receptivity and retention.

Pro Reveal Facial System is now AVAILABLE with 2 types of tips!

1. Diamond Tips

Grit Tip

Advantages

- Slough off the top layer of dead skin cells; especially the buildup of dead skin
- Get rid of damaged cells

Recommended for

- Coarse skin texture
